

SynergisticIT Job placement Program Presentation

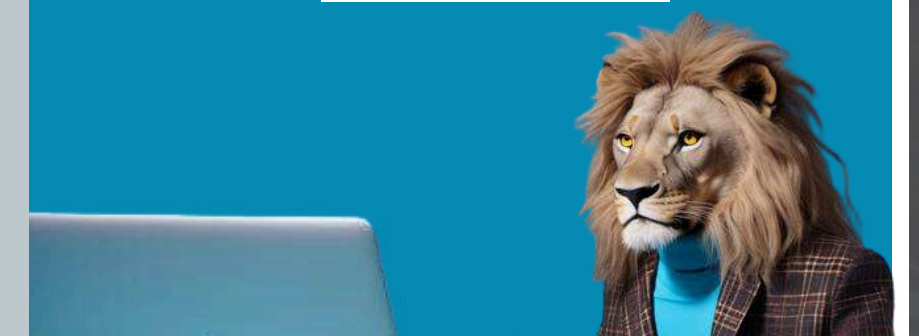

Let's change how tech Clients see you !

Before

After

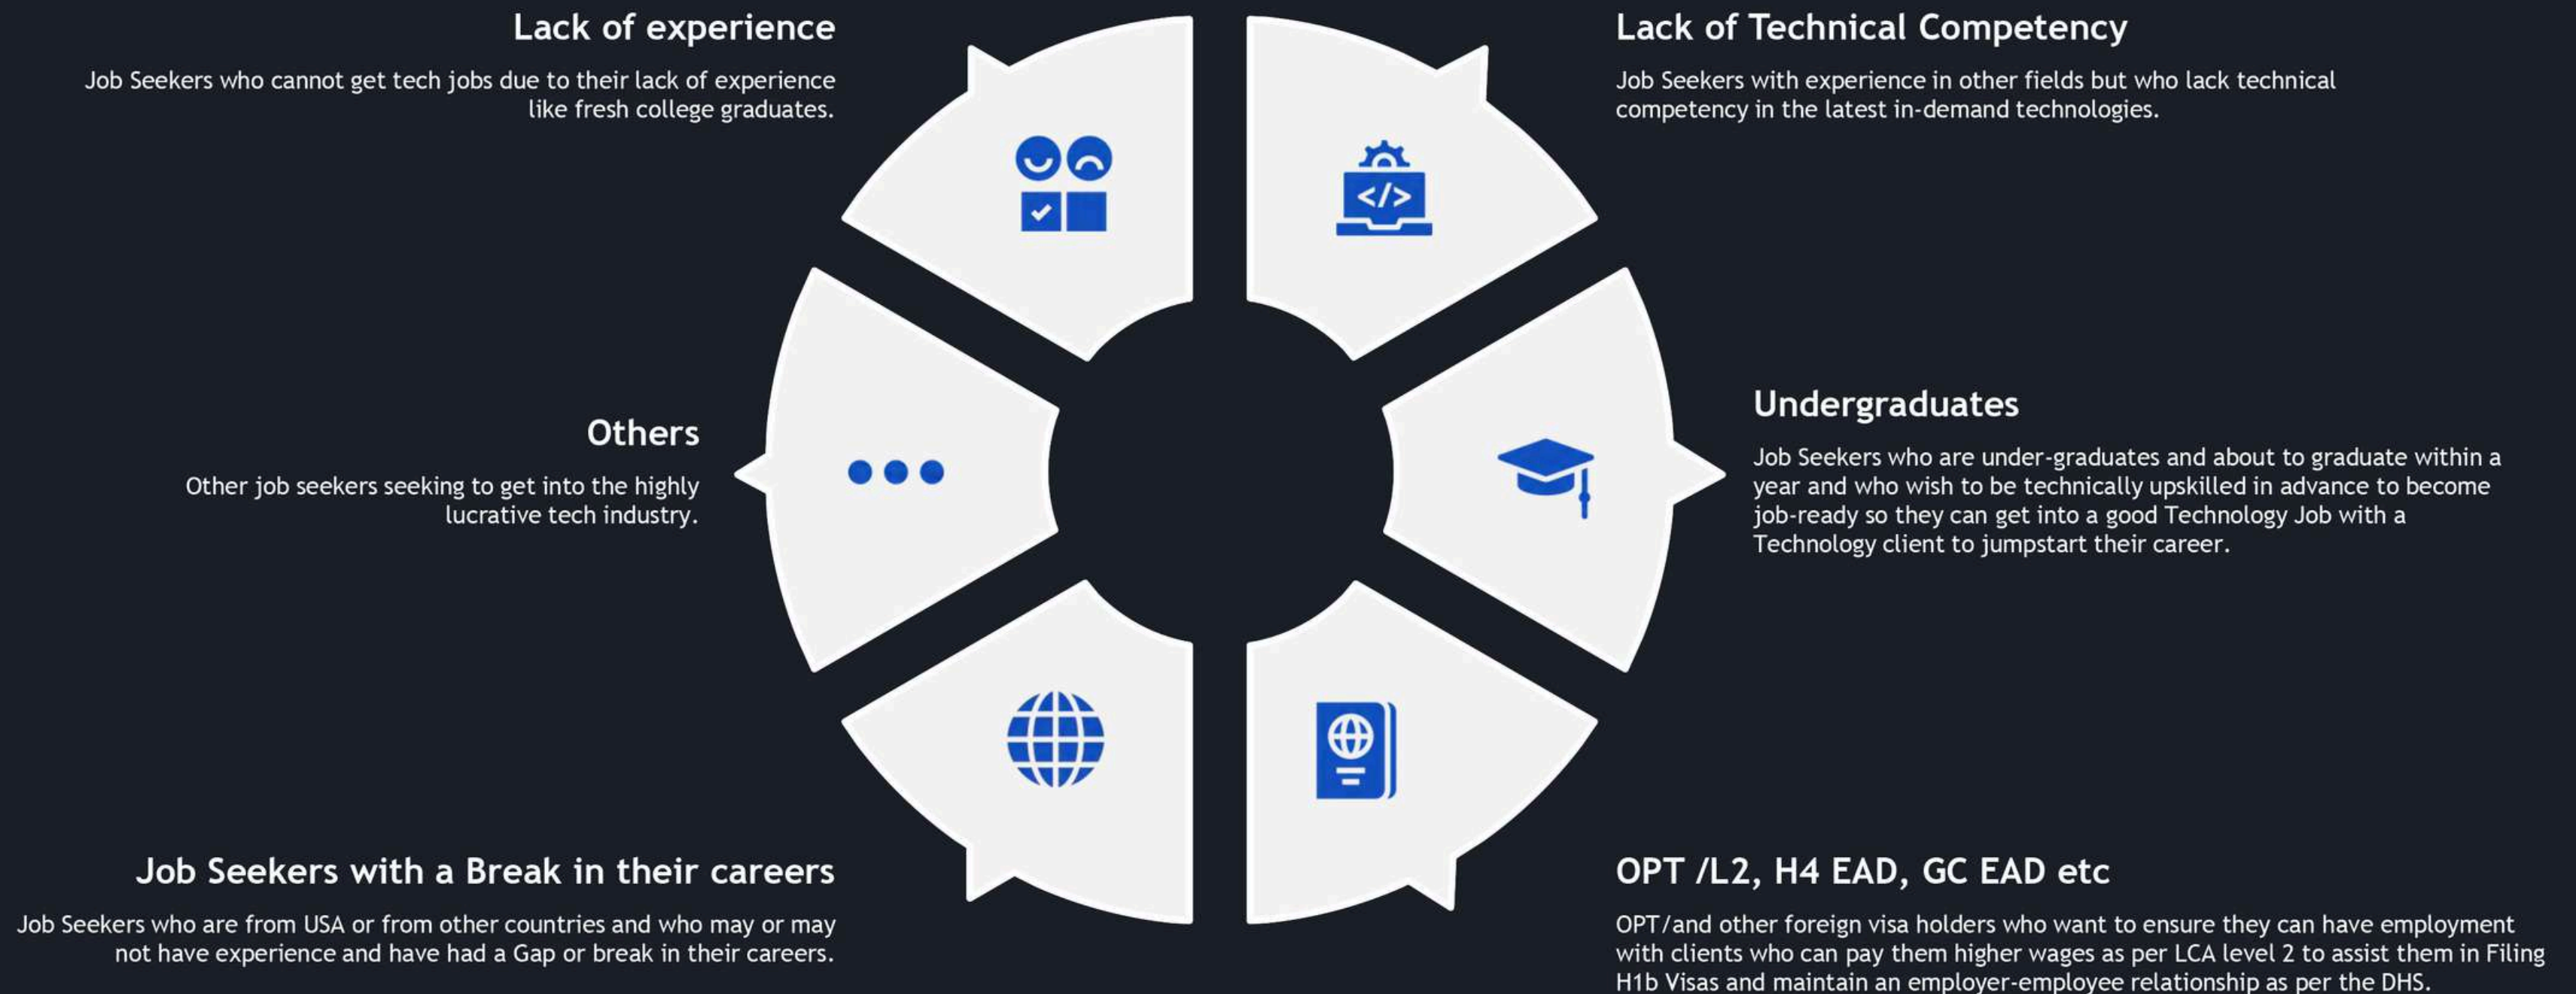

Bootcamps are so yesterday! Come to Techbraincamp !
We get you hired!

01

Who is suitable for
attending our technology
upskill program?

Who Is Suitable for Attending Our **Technology Upskill Program**?

Our Process

Success Doesn't Come To You You Go To It!

Advantages of Joining SynergisticIT's Skill Enhancement Program

01

Results

At SynergisticIT, we get you hired. Check out our candidates' outcomes page with pictures of successful candidates. Check our results and compare them with any other organization. We have placed 1000's of candidates at companies like eBay, Intel, Wells Fargo, Google, Apple, PayPal, Cisco Systems, Deloitte, Capital One, Bank of America, SAP, GAP, Verizon, Intuit, Ford, Walmart Labs, Hitachi, Western Union, to name a few clients. Almost 20-30% of our joiners have already attended different bootcamps, invested their time and money, and after failing to land a job offer have joined us.

02

Highest Salaries in the Industry

Our graduates start with an average salary of \$85k and a salary range of \$81-\$150k, exceeding the \$50k average from other bootcamps

03

Tech Industry Interaction

We are regular sponsors of events like [Oracle Cloud World/Gartner Data & Analytics Summit](#) , where we engage with the tech industry and learn about the latest technology demands and transfer that knowledge to our Upskill Programs.

04

15 years of Tech Industry Experience

We have been helping candidates secure tech careers for the past 15 years, i.e., since 2010. Our experience leads to a better match between industry expectations and what we upskill on. Due to our experience and interactions with the tech industry, it translates to more hires. We have the fastest-changing curriculum in the industry based on continuous feedback from clients.

05

Complete Solution for Jobseekers

We offer a complete solution from upskilling you in different technologies, making you work on projects, getting you certified, preparing you for interviews, and connecting you with our tech client network. All in all, we do whatever it takes to ensure you transform from a jobseeker to a candidate that clients seek.

06

Interview Preparation

We prepare for interviews for technical, behavioral, and scenario-based. There are interview prep bootcamps that charge almost \$5,000 for preparing for interviews, and we provide that at no extra cost. We will give you Blunt upfront feedback, which you won't get anywhere.

07

Best Option for F1 Students

F1 OPT/STEM students can do the program while they are still in school to ensure a job offer as soon as they graduate. We can help them stay away from [consulting companies](#) that take advantage of F1 students. We also assist in stopping unemployment days for OPT students in their 1st year of OPT and also STEM extension and H1B filing by helping them get full-time job offers with tech companies. A F1 OPT candidate should be differentiated technically from other job seekers so that tech clients can hire him/her. If having superior technical skills as compared to other job seekers, tech clients will be willing to file a STEM extension, H1B, or GC as they want to retain good technical talent who they can hire at a lower cost as compared to an experienced candidate.

08

Genuine Resumes /Helpful for Career Gaps

No fake resume; only real projects and tech skills that you upskill on. Job seekers with career gaps or non-USA experience can also benefit from this program to restart their tech career.

09

Small Batches

Our batches are small, which leads to better quality and more time available for asking questions and clarifying doubts. You won't get lost in a crowd of 25–30 attendees like in other places.

10

Live Sessions

All of our sessions are live with no recorded sessions; most other bootcamps use some live sessions and rest recorded sessions

11

Certifications

We prepare you for multiple certifications at no extra cost. If someone wants to get a Java certification from Oracle Corporation, Oracle will charge almost \$5000 for the training for the certification.

12

Return On Investment (ROI)

SynergisticIT's Job Placement Program is structured so you put \$10k down and pay the rest only after an \$86k+ offer, then recoup the full cost in the first 1–2 years of a typical \$95k–\$154k tech salary—higher ROI than most college degrees or bootcamps that charge everything up front with no placement condition

[SynergisticIT vs. College: Comparing ROI for IT Careers](#)

13

Marketing and Resume Guidance

Everything is included with us. Resume preparation guidance, marketing services to ensure your resume is sent to thousands of tech clients.

14

Extensive Sessions

5-7 hours of sessions each day, 5 days a week. For almost 5 months to 7 months of comprehensive sessions lead to a higher level of tech upskilling

15

Real Reviews

Unlike other places, we don't mask bad reviews. We welcome them. We, like any other organization, also have bad reviews; however, if you go through them, you will discover they were written by people who were upset due to other reasons and were written by people who never took our program

[SynergisticIT Reviews : Real Student Outcomes & Job Placement Ratings](#)

16

Trainers/Faculty

We utilize professionals from the real world who are subject matter experts from the industry and not just theoretical trainers. You learn from people who are building and developing things in the real world so that once you get hired, the transition is seamless.

17

Location/Contracts

You choose and tell us the location where you prefer to work, and we will inform you of the timeline with no pressure on relocating either for the program or for the job. We don't have any binding contracts other than repayment of our fees once you secure a job offer after completing the program

18

Remote Upskilling

You can be situated anywhere in the USA or Canada to take our program or to get hired on a job.

19

Recorded Sessions/ Pure Marketing Only Option

Option to view recorded sessions if working on a job and unable to attend live sessions. It will not be as effective, and we strongly advise against it. We also have an option for marketing a resume to tech clients if a candidate has preexisting good technical skills and experience.

20

Unlimited Time/ Post Job Support

With SynergisticIT, you can keep taking sessions as long as we feel and you feel you need to. We don't stop your sessions or charge you extra fees if you have to redo a course or repeat sessions. Once you secure a job offer, we will provide you with 12 months of technical and job support at no extra cost.

** Balance Fees are conditional on securing a Job of \$86k or Higher and payable in installments which are 24 payments @ 15% of 24 monthly payroll . Total Fees: Initial investment \$10k + 24 payments @ 15% of 24 monthly gross payrolls capped at \$26k*

Before

After

We give you the Tech Tools to get you hired !

Frequently Asked Questions

Frequently Asked Questions

Q2. I already Did a Bootcamp or I have a Degree! Do I have to do upskilling or JPP?

Most bootcamps or colleges don't cover the tech stack that the tech industry wants and expects. We, on the other hand, have more than 15 years of experience in the tech industry and regularly go to tech industry events like Oracle Cloud World, Java One, and the Gartner Data and Analytics Summit which helps us gain insights into what the tech Industry expects from employees and the latest technologies which they demand from jobseekers. We implement that into our program so that when a candidate joins us, they can rest assured they are always working on the most in-demand technologies required by employers. Also, we have a network of more than 24000 clients and a database of more than 5000 interview questions which gives our candidates a competitive advantage.

<https://www.synergisticit.com/roi/>

<https://www.synergisticit.com/tech-companies-not-hire-computer-science-graduates/>

Q1. Can you Just Market me I have all the skills

If you feel that you have all the skills then the real question to ask is why the clients are not calling you or why you are not getting a job offer. We know the client's expectations and give you the tech stack and skills that will make you desirable to Clients. In certain cases, we can market you directly. Also, if you have all the skills and experience that clients want. Again, the Client is Always Right. <https://www.synergisticit.com/interview-prep-bootcamps/>

Q3. I see there are many bootcamps giving job guarantees or refunding tuition fees. Do you do that?

Most refund guarantees given by programs have a lot of clauses and fine print. We, on the other hand, don't need to give you a refund as you can get back the money but the most valuable resource is time which you can't get back. Almost 30% of candidates who join us actually speak to us and join some other bootcamp and then they come to us after 6-9 months after they fail to secure success. So read the fine print. You don't want a refund—you want a job.

Q5. If you're so sure about getting me hired, take fees after I get a job.

We are only taking approx. 30% of our fees before and the rest 70% we take over 2 years or so, once you secure a Job Offer. We have investments in quality upskilling and marketing and at the same time, we only want serious candidates so that's the major reason we have a high collateral.

Q7. I read some bad reviews. Why are there bad reviews?

Please check carefully if you see a bad review check if the review is from someone who took our program or someone who was not happy because he got an email or did not like the cost of the program or is someone employed by a competitor. Most bad reviews have been written by people who never undertook our program. If you see a bad review of someone who undertook our program and was dissatisfied please bring it to our attention and we would be pleased to answer any concerns. Here is one complaint from one of our people who joined. However as per this complaint you can see due to our program he was able to secure a job offer <https://www.bbb.org/us/ca/fremont/profile/tech-support/synergisticit-1116-894990/complaints>. To watch reviews and Video testimonials of candidates who took our JOPP please visit [SynergisticIT Reviews: Real Student Outcomes & Job Placement Ratings](#)

Q4. Many Programs are significantly cheaper. Why are you so expensive? I could do college with this investment!

Most of the programs or bootcamps which are significantly cheaper are due to the fact that they don't make investments into their program. They have almost no or minimal live sessions where you can speak to trainers and most importantly, they don't help you with marketing or securing a job offer. We should not be compared to any or all bootcamps as what we do in terms of interview preparation, soft skills coaching, communication skills, coding preparation, and—most importantly—marketing to clients, makes us stand out from all others. We are more about helping candidates secure job offers and we just make you get the tech skills that clients want.

<https://www.synergisticit.com/why-cheap-coding-bootcamps-may-be-expensive-for-tech-training-in-the-long-run/>

Q6. I see many people on LinkedIn who have been with you for more than a year.

There are 2 reasons why that might be--Those candidates may not have updated their LinkedIn or those candidates did not complete their certification and assessments so they are not in the market or may be in the market but are not getting hired. Many candidates take part-time jobs or take vacations or breaks which prevents them from doing the program well, which would lead to longer time in them securing a Job. A pre-condition of ours is for the candidates to clear assessments and certifications which we prepare them for. Post that many of our candidates even get multiple job offers as high as \$150k on their first jobs itself.

Q.9. How many people of yours don't succeed and why?

We don't like blowing our trumpet, but our candidate success outcomes speak for itself. We have a higher placement rate of 91.5%, which is relatively more than other coding bootcamps. Our team is committed to your success, and we assure to provide maximum ROI (Return on Investment).

<https://www.synergisticit.com/comparing-synergisticit-roi-to-colleges/>

Q.8. Do you have a network of clients?

Being in the tech industry for almost 15 years, our candidates are valued due to their high level of skills and desired by major tech clients like Google, Apple, Adobe, PayPal, IBM, Dell, and Cisco, to name a few. Our Candidates competitive advantage is both their technical skills which are upgraded by us as well as Our reach and brand name established and valued by clients over the past 15 years.

Q. 10. Why are your people getting more salaries?

Most of our graduates' secure higher-paying jobs ranging from \$75k to \$150k as we impart a well-rounded knowledge of most in-demand technologies. Our curriculum keeps updating as per the latest trends to help candidates meet the industry standards. Also, our end-to-end career support helps them stay ahead of the competition.

Q.12. What happens if I don't get a Job?

You are not responsible for any remainder payments until we help you secure a job.

Q.14. What happens if I get a job which pays me \$86k or less?

Your Payments don't start till you secure a job that pays you more than or equal to \$86k per annum. Our graduates earn an average salary of around \$85k- \$90k with an average pay range of \$85-\$150k.

Q.11. What happens if I lose my job? Do I still have to Pay?

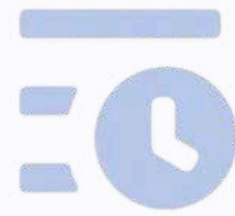

Our training is so extensive that the chances of this happening are very low unless the client shuts down or loses funding. If any unforeseen reason happens, your payments will pause until you gain employment again. The Best thing is for a period of 12 months we will assist you in securing interviews and reaching out to clients

Q. 13. What are the qualifications of the trainers?

We have a rich faculty of highly skilled tech professionals with an average industry experience of around 10 years.

Q.16. How do I know you are genuine? How can I trust you?

We have been in business since 2010. You can also check Our [Glassdoor](#) and [Google reviews](#) or [watch video reviews on our reviews page](#) and visit [Job Placement Program](#) page to see pics of successful candidates. We have the highest salaries and successful outcomes.

Q.15. What if I don't understand things or I need more time?

You can stay in the program, and we will continue training until you are good enough for the job market. We only want to send out once you are ready to kickstart your career.

Data Science, Machine Learning, PythonTrack & Java, Full Stack, AWS Track

Data Science Job Placement Program:-

Our Data Science track is focused on providing immersive training in four advanced Technologies like Data Science, Machine Learning, Python, and AWS. It lets you master top-tech skills such as Web Scraping, Data Visualization, Data Manipulation, Predictive Modelling, Python, AI, Business Analytics, Tableau, Power BI, Snowflake and Redshift, Azure (e.g., Data Lake, Data Factory, Synapse), Apache Spark, Apache Kafka, AWS- S3, Glue, GCP, Python, NumPy, SciPy, Pandas, Matplotlib, Seaborn, PyTorch, TensorFlow, Scikit-Learn, Hugging Face, LLM, GenAI, SQL, NOSQL, Computer Vision, Market iBasket Analysis, Time series Analysis, Deep Learning, File Handling, Duck Typing, Data Structures and Algorithms, AWS, Azure, Pandas, Lambda, NumPy, Django,, etc. To be eligible for this program, you should have a Statistical or Mathematical background with basic Python programming knowledge.

Job Roles after Successful Completion of our Program

Data Analyst

BI Analyst

Business Analyst

Power BI Developer

Python Developer

Machine Learning /Artificial Intelligence engineer

Data Analyst/Data scientist hybrid

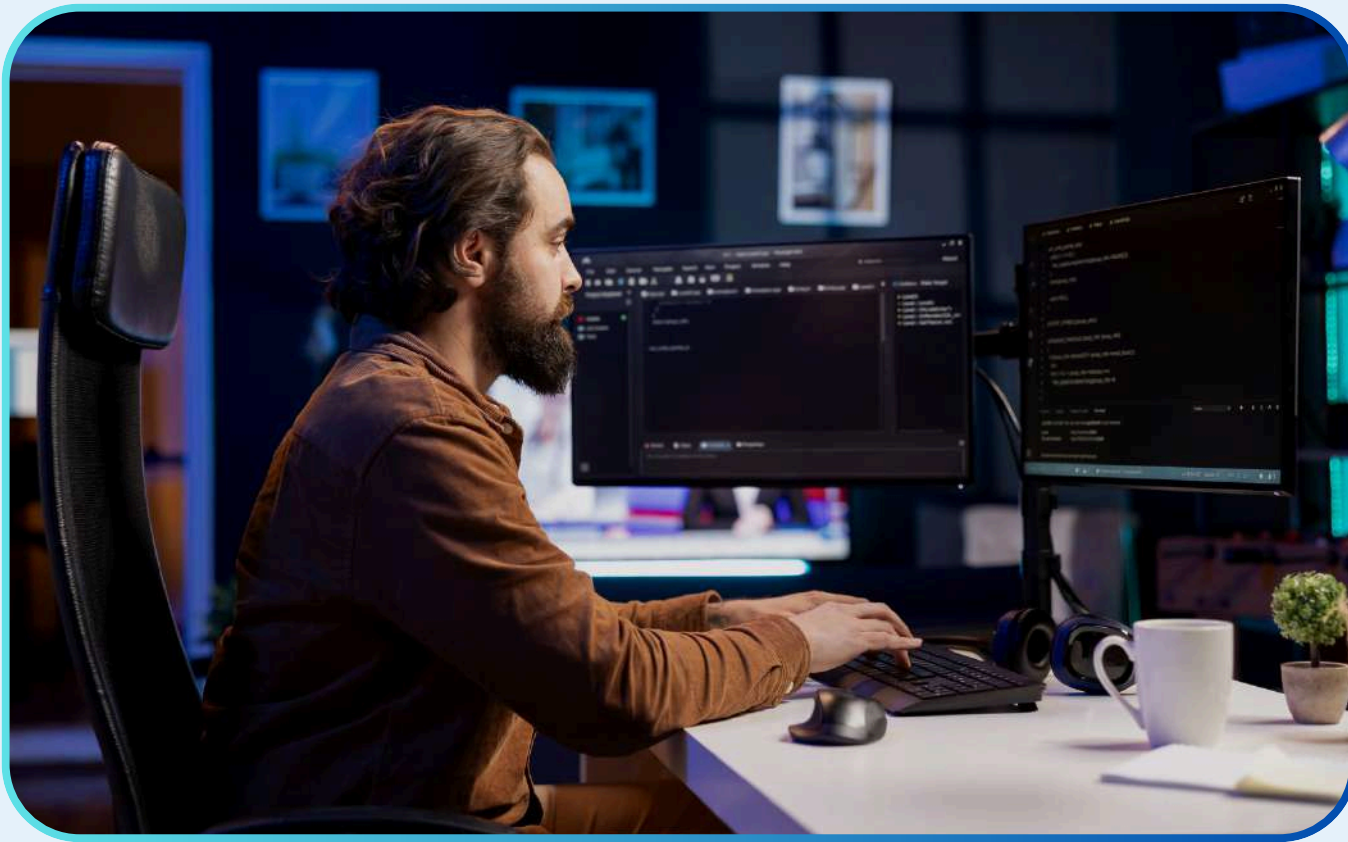

Data Scientist

Data Engineer

Tableau Developer

Salaries Expected post completion of the Program

\$86k to \$150k per year

Java Backend /Full Stack/Devops Job placement Program:-

Our Java track revolves around building your skills in Java programming, MERN Stack, and AWS. You will learn essential concepts like OOPs, Multi-threading, Exception Handling, JSP, Servlets, Spring, Microservices, Spring Boot, Git, Jenkins. Docker, Terraform, Kubernetes, Maven, Git, GitHub. Hibernate, JavaScript, JSON, Microservices, Rest Webservices, MongoDB, Cassandra, PL/SQL, React.JS, Mean and Mern Stack Angular.JS, Express.JS, AWS, MongoDB, Express, ReactJS, Node.js), AngularJS, Data Structures, Algorithms, Project work etc. One needs a CS or Engineering degree with basic coding experience in Java, JavaScript, or C++ to be eligible for this program.

Job Roles after Successful Completion of our Program

Java Developer

Java Backend Developer

Full Stack Developer

Front End /UI Developer

Mern Stack Developer

Software engineer

Software Programmer

Software Developer

Java Devops Developer

Java Production Support Engineer

Salaries Expected post completion of the Program

\$90k to \$150k per year

05

Why Choose

91.5%

Student Success Rate

\$82k to \$150k

Average PayScale of our Graduates

6-12 Weeks

most of our graduates get a job within 6-12 weeks of completing our program

Why choose? SynergisticIT

SynergisticIT has more than 12 years of industry experience in helping candidates into Jobs, so we have a pulse on the Job market and our skill enhancement is based on the current needs of the Tech Industry. We Know the Pulse of the Market. Our Focus = Getting you Employed

Highest Minimum salary in the Industry

Highest minimum salary for activation of repayment. A Job seeker needs to get a Job which pays him/her a Minimum Salary of \$86,000.00 per annum before payment for the remainder amount starts. This is the Highest in the Industry. 99 % of other bootcamps ask their bootcamp Joiners to start making payment as soon as they start making \$45k-50k per annum salary.

Highest success rate and Average salary in the industry

Highest average salary of \$85,000 by our alumni and varies in the region of \$82k-\$150k with almost 91.5% successful outcomes. Other bootcamps will show some high salaried graduates on their websites but in reality a high percentage of their alumni struggling to find jobs after completion, dropping out or getting low paying jobs which pay them like \$45-55000 per annum.

Most hours of Live Sessions in the Industry

We invest more time into our programs and candidates. Our programs are done 5 days a week with live daily sessions for 5-7 hours each day for 5-6 months at the minimum. We believe anyone can have the will to succeed but the will to put in work to succeed is what is more important.

Comparison: SynergisticIT Vs Others:-

Home of the Best Data Scientists and Software Programmers in the Bay Area

Bootcamps

Colleges/ Universities

Staffing/Consulting Companies

<u>Points</u>				
Interview Preparation/ Resume Prep /Soft Skills /Body Language/Communication skills Guidance	 Extensive interview preparation sessions covering coding, behavioral, scenario- based interviews, DSA, and access to 5000+ q's of our personal database of interview questions from actual clients.	 Not much help as not having enough resources of experience		 Some places may help with resume.
Marketing of resume to clients to help secure interviews	 Handholding and support throughout, untill the trainee secures a job offer	 NO Support for marketing just gyuidcance by career counsellor like the ones in college . Leading to Unemployment		
15 Years of Tech Industry Experience				
Database of more than 24000 tech clients				

Comprehensive tech upskilling to cover the tech stack shortfall required in interviews by clients	 Detailed, in-depth coverage of tech stack due to our connections and insights received regularly from tech clients.	 Some tech stack covered; however, not aware of what tech stack is in demand by tech clients.		 https://www.synergisticit.com/why-jobseekers-should-avoid-consulting-or-staffing-companies/
Certifications preparation by accredited tech companies like Oracle, AMAZON (AWS) , Microsoft (AZURE, PowerBI), IBM, etc	 Preparation on a wide variety of industry-accredited certifications like Oracle Certified Java Professional, AWS, Azure, Snowflake, Microsoft certifications, etc., at no additional cost. Organizations normally charge as much as \$2K-\$5K for certification preparation alone.			
Helpful for OPT and other visas, and full-time job offers.	 Yes, as they are able to attain advanced tech skills which can help them secure full-time job offers and maintain their stay in the USA through stable employment.https://www.synergisticit.com/guide-for-opt-students-to-maintain-immigration-status/		 In Some cases	
Genuine Resume and Projects				 https://www.synergisticit.com/why-opt-students-should-avoid-consulting-or-staffing-companies/
High salary offers -\$85-\$150k for most	 Our candidates get salaries ranging from \$81k-\$150k . Which is the highest in the industry	 Most graduates either don't secure job offers or get salaries of \$55K-70k or lower.	Maybe only for very few.	 Mostly high offers are for very experienced candidates.

Help after completion for on-the-job support and job hunting	✔ For 1 year	✘	Very minimal	NA
Refund if unable to secure a job.	✔ We will refund fees in the event of non securing a job offer (for refund job offers of \$60k or higher will be considered valid offers even if the minimum cap of \$86k is not achieved) for all US citizens, Green card holders, and EAD holders with at least 3 years of valid work permit when joining us, within 240 working days of the start of marketing of resume by us. This is on the condition that there is 100% attendance , no background check issues, the certifications asked by us and assessments provided by us are cleared (3rd party industry-accredited, not ours) with 75% or higher scores, the candidate does not miss any interviews, respond to our calls emails for marketing and interviews, attends regular interview prep sessions and completes our projectwork. Please ask for specific details.	✔ For some, with lots of clauses	✘	NA
All sessions are live instructor-led sessions	All sessions are live, with Instructor-led sessions—5-7 hours each day—so that any queries can be answered in real time. This is very essential for an engaging learning experience. All the sessions can also be recorded if the trainee is unable to attend sessions on a specific day.	✘ Minimal. Almost all bootcamps may have a mentor, but most of the content is pre-recorded. OThere is only 1 hour or so of instructor-led sessions; the rest is trainees working on their own and asking each other. This is a poor way of learning as none of them know enough .Pre-recorded content is equivalent to doing coursework from YouTube or Coursera or Udemy with minimal assistance.	✔	NA

Tech Industry interface with regular participation at major tech industry events like Oralce CloudWorld and Gartner Data Analytics				NA
Pay for performance, like pay after getting hired.	 Yes. We only take partial fees. The balance fees are payable upon helping the candidate secure a job offer of \$86k or higher. No payment of balance fees untill a job offer is obtained.	 Mostly no		NA
Full-time or part-time	 However, we prefer full-time.			NA
ROI Clarity	 https://www.synergisticit.com/roi/			
Qualification of trainers	All with an average experience of 10 years or more.	Mostly 1 or 2 trainers or mentors; the rest of the sessions are recorded, and the class interacts with each other while doing project coursework.		
Proof of candidates actually getting hired	 Check Job Placement Program Successes and SynergisticIT Reviews Real Student Outcomes & Job Placement Ratings 90% of the candidates who get hired after our JPP -its their 1st Job in the USA	 Mostly, they will share 5-10 candidates with high salaries who might already have experience and are compensated for the endorsement.
